

CARBON

IT'S A STUNNIN' PRO

It's woven into the fabric of who I am.

Protecting you in your professional pursuits is what we do at CarbonX. *It's woven into the fabric of who we are.*

CarbonX® baselayer solutions protect against the real-life thermal hazards professionals of all kinds face in their work environments. Our Ultimate™ Baselayer is truly non-flammable and will not burn, melt, drip, ignite, shrink, or char, even when jumping from buildings covered in flames. It is also highly resistant to molten metal, flammable liquids, and hot chemicals, and it provides excellent protection from arc flash.

Trained professionals like these rely on CarbonX to keep them safe doing what they do every day. (Do not try this; trained professionals at work.)

Visit the CarbonX booth (#3248) at the 2016 NSC Expo, October 17–19, in Anaheim, California.
