HOT SHIELD USA

I'M A WILDLAND FIREFIGHTER

It's woven into the fabric of who I am.

Your job has inherent risks. Our job is to protect you. *It's woven into the fabric of who we are.* Wildland firefighters can bravely confront the unpredictable and relentless nature of wildfires wearing a Hot Shield face mask or helmet shroud constructed of CarbonX® non-flammable fabric. No facial protective gear delivers better protection against flame, heat, smoke, and ash.
